

CLAIMS:

1. A head for an electric toothbrush, comprising:
 - a first bristle support which is rotatable about an axis;
 - a plurality of first bristles extending from the first bristle support;
 - a second bristle support; and
 - a plurality of second bristles extending from a surface of the second bristle support at an acute angle to the surface.
2. The head of claim 1, wherein the first bristle support is rotatable in an oscillating manner about the axis.
3. The head of claim 1, wherein the first bristles extend substantially perpendicular from the first bristle support.
4. The head of claim 1, wherein the second bristles are angled towards at least some of the first bristles.
5. The head of claim 1, wherein the second bristles are angled away from at least some of the first bristles.
